

ORBITGAME

The first innovative hybrid yield farming DAPP with an unique variable cooldown timer and no fully locked plans for user comfort and a new game theory.

PROBLEMS in THIS SPACE

Many ROI Dapps have appeared lately and more are coming out on a daily basis. What they all have in common though is that they are not innovative at all.

They have the same 6 plans (3 unlocked and 3 locked plans) with the same or increased APR and basic design.

But why?

Because it is always easier to copy something existing than putting in the work to fill the gaps and create innovation.

We did exactly that and created Orbitgame with an unique contract and an outstanding branding.

The 3 biggest problems:

1.) The 14 days locked plans drain

Many users invest in a new ROI-Dapp as soon as it goes live and once the 14 day timer is up, the locked plans unlock - drain the contract and the game is over.

The biggest reason for that is because users who invest in locked plans do not have the possibility to cash out anything before the timer is over.

Once the timer is over, investors only have the option to cash out their full profits, or nothing which is not healthy for the system or for the community. It's all or nothing and this cannot work out.

With this type, there are many people who lose everything after 14 days

and have not even had the opportunity to limit losses or withdraw once.

2.) Referral Commission Exploit

Since the current ROI contracts are and were always the same, users gained additional advantages in the system at the expense of ordinary users through „account stacking“.

With stacking of one or more own accounts/wallets, users were able to get a commission on their own deposit without barriers and have thus additionally burdened the contract.

This was mainly possible because only a single minimum deposit was required to unlock all levels.

3.) Too many copycats

It's hard for a regular user to figure out which ROI dapp will be big and successful because the design and the investment options are basically always the same. No innovation as mentioned.

Most of them use the same insanely high APRs for locked plans, as well as increased percentages in the recommendation levels to lure new users which does nothing other than draining the contract very fast.

OUR SOLUTION

1.) The 14 days locked plans solution

Since we are addressing the problems in this industry and are creating something new. We will not have any fully locked plans which can only be withdrawn at the end of the period.

Instead we have 8 different plans, 3 where rewards can be withdrawn at any time and 5 others are limited to every 6, 12, 24, 48 and 168 hours for withdrawing.

We also have adjusted the APRs for these plans.

With this approach we create innovation, protect investors from a total loss and give every user the opportunity to withdraw frequently.

2.) Referral Commission Exploit solution

Another big innovation we are providing is our „Unlock your Level“ mechanism. (More on page 8)

It does not only sustain the contract balance additionally with more deposits, but also prevents users from being instantly unlocked for all levels and the 10% commission.

If a commission happens and you, the user is not unlocked, the commission stays in the contract for all other players.

This enables us to separate our honest partners from exploiters and prevent commission exploits in general.

(more on page 8)

3.) Copycats solution

We put a lot of time and energy into an intricate and recognizable design, that looks spacey and sexy at the same time and brings fresh air into the industry.

All of this is unique and has not been considered by a single project so far.

INVESTMENT CONDITIONS

OrbitGame - The first innovative hybrid yield farming DAPP with a unique variable cooldown timer and no fully locked plans for user comfort and a new game theory.

Improved unique contract for a new game theory:

Choose between 5.5% up to 13 % daily ROI, depending on the „cooldown timer“ or „anytime withdrawal“ package you choose.

We provide 8 plans with unique variable cooldown timers and adapted APR 's for each package!

Our plans include:

- 3 plans with anytime withdrawals
- 5 plans with flexible withdrawals every 6, 12, 24, 96 or 168 hours
- No fully locked plans anymore to secure user fund safety and prevent users from total losses.

Basic interest rate (only for new deposits):
+1% every 24 hours (~0.04% hourly)

Hold bonus: If users don't make a withdrawal per 24h, they will get an extra bonus - the hold bonus. The hold-bonus increases by 0.1% per day, and max by 1.5%. If users withdraw, the hold-bonus will reset to 0%.

Minimal deposit: 0.05 BNB and no max. limit

INVESTMENT PLANS

We have two types of packages with different periods and percentages of profitability

Plan Type No1

Withdraw profit any time

Plan 1 - (14 days) - **8% per day** - 110% profit

Plan 2 - (21 days) - **6% per day** - 126% profit

Plan 3 - (28 days) - **5.4% per day** - 151% profit

Explanations:

1. Starting percentages increase every day by 1% for new deposits.
For example: On plan 1 on day 5 of the project, the starting percentage will already be equal to 13% per day instead of 8%
2. The percentage is fixed at the start of the plan.
For example: on the 12th day of your plan, the percentage will be the same as it was at the very beginning of its work.
3. You can withdraw your earnings anytime

INVESTMENT PLANS

We have two types of tariff plans with different periods and percentages of profitability.

Plan Type No2

Withdraw every 6, 12, 24, 96 or 168 hours, depending on the plan.

Plan 4 - (14 days) - **8.6% per day** - 120% profit - withdraw every 6h

Plan 5 - (21 days) - **7.6% per day** - 160% profit - withdraw every 12h

Plan 6 - (28 days) - **7.5% per day** - 210% profit - withdraw every 24h

Plan 7 - (28 days) - **9.6% per day** - 270% profit - withdraw every 96h

Plan 8 - (28 days) - **13% per day** - 364% profit - withdraw every 168h

Explanations:

1. Starting percentages increase every day by 1%.
For example: On plan 1 on day 5 of the project, the starting percentage will already be equal to 13% per day instead of 8%.
2. The percentage is fixed at the start of the plan.
For example: on the 12th day of your plan, the percentage will be the same as it was at the very beginning of its work.
3. Plans with flexible withdrawals every 6, 12, 24, 96 or 168 hours. No fully locked plans anymore to secure user fund safety and prevent users from total losses.

REFERRAL SYSTEM

Earn up to **10% comission**, **5 levels deep**, if you have unlocked your levels with the necessary minimum deposit. If you have not unlocked your levels - the **comission of the commissioned deposit remains in the verified smart contract for all players.**

It is not possible to receive your commission afterwards.

You will receive:

- 5%** from each **level 1** referral deposits (0.05 BNB deposit)
- 2.5%** from each **level 2** referral deposits (0.2 BNB deposit)
- 1.5%** from each **level 3** referral deposits (0.5 BNB deposit)
- 0.5%** from each **level 4** referral deposits (1.5 BNB deposit)
- 0.5%** from each **level 5** referral deposits (2.5 BNB deposit)

Explanations:

1. You need to have at least 1 deposit to start receiving earnings in your first level.
2. You need to use your referral link to record the people you refer.
3. Your referral rewards will be sent straight to your wallet, you don't have to withdraw manually.

SMART CONTRACT

Our Smart-Contract is safe for use on the BSC network.

Official Address: 0x8c199e13bD92f1B83b265642a61F157a4ba1F748

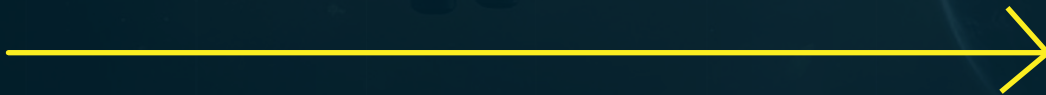

Our Smart-Contract is Audited by HazeCrypto and they found **no vulnerabilities, no backdoors** and **no scam scripts**.

How to SETUP your metamask

METAMASK

Follow these easy steps to integrate Binance Smart Chain into your Metamask wallet

How to SETUP your metamask

METAMASK

Follow these easy steps to integrate Binance Smart Chain into your Metamask wallet

Step 1

Go to chainlist.org

Go to <https://chainlist.org/> and search for „Binance Smart Chain Mainnet“. Below the box press „Connect Wallet“ and allow metamask to add the network to your wallet.

The BSC network should now be added to your Metamask wallet.

Step 2

Switch the network in your Metamask wallet

To do this, click on the current network at the top of your MetaMask wallet.

Then click on Binance Smart Chain Mainnet.

Done! You can now connect to our Dapp!
